NOTES TO CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended October 31, 2018 and 2017

(Amount expressed in thousands of Canadian dollars, except where indicated)

1 Nature of operations and going concern

Candelaria Mining Corp. (the “Company”) is a British Columbia public company listed on the TSX Venture Exchange (“TSXV”) under the trading symbol “CAND.V”. The Company also trades under the symbol “CDELF” on OTC Pink. The Company was incorporated under the Business Corporations Act of British Columbia on January 23, 2012. The Company’s registered and records office is located at Suite 1200, 750 West Pender Street, Vancouver, BC, Canada, V6C 2T8. The address of the Company’s head office is 1201 - 1166 Alberni Street, Vancouver, BC V6E 3Z3.

On February 27, 2015, the Company, entered into an agreement to acquire a 60% interest in Minera Apolo, S.A. de C.V. (“Apolo”). Apolo is a privately owned exploration company with certain mining concessions located in the State of Zacatecas, Mexico (the “Property”). The Company finalized the agreement for the acquisition of Apolo on March 17, 2016 (Note 6(a)).

On May 11, 2016, the Company signed an agreement to acquire the Caballo Blanco Gold Project (“Caballo Blanco”) in Veracruz from Molimentales Del Noroeste, SA de CV, a subsidiary of Alio Gold Inc. (“Alio”), formerly Timmins Gold Corp. (Note 6(b)).

Going concern

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future which is at least, but not limited to, twelve months from the end of the reporting year. Management is aware in making its assessment of material uncertainties relating to events or conditions that may cause significant doubt upon the Company’s ability to continue as a going concern, as explained in the following paragraph.

The Company has not yet generated income or cashflows from operations. As at October 31, 2018, the Company had an accumulated deficit of \$18,449 (April 30, 2018 - \$16,274). For the six months ended October 31, 2018, the Company incurred a net and comprehensive loss of \$2,131 (October 31, 2017 - \$3,801) and negative cashflows from operations of \$1,566 (October 31, 2017 - \$3,692). The Company will require additional financing, through various means including, but not limited to equity financings to continue the exploration program and to meet its future obligations and administrative expenses. There is no assurance that the Company will be successful in raising the additional required funds.

The above noted conditions indicate the existence of material uncertainties that creates significant doubt about the Company’s ability to continue as a going concern. These condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities, to the reported expenses and to the financial position classifications that would be necessary if the going concern assumption was inappropriate. These adjustments could be material.

2 Basis of presentation

Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance IAS 34 – Interim Financial Reporting as issued by the International Accounting Standards Board (“IASB”). Accordingly, certain disclosures included in annual financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the IASB have been condensed or omitted and these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended April 30, 2018. The financial statements have been prepared on an accrual basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities. The financial statements are presented in Canadian dollars.

The Company’s interim results are not necessarily indicative of its results for a full year.

These unaudited condensed consolidated interim financial statements were approved by the Board of Directors on December 20, 2018.

Use of estimates and judgements

The preparation of the Company’s unaudited interim condensed consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management’s experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Such estimates primarily relate to share-based transaction valuations, fair values of

(Amount expressed in thousands of Canadian dollars, except where indicated)

financial instruments and the recoverability of deferred income tax assets. Actual results could differ from those estimates. Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in Note 1 relating to going concern.

Acquisition of mineral property interests

The Company treats the acquisition of a mineral property interest as either a business combination or asset purchase. The determination of treatment is based upon an assessment of factors at the time of acquisition.

A business combination is a transaction in which control over one or more businesses is obtained. A business is defined as an integrated set of activities and assets that is capable of creating outputs which provide a positive economic return to stakeholders. If the integrated set of activities and assets is in the exploration or development stage and therefore does not have outputs, the Company considers other factors to determine if the assets are a business. These include, but are not limited to, whether the set of activities and assets:

- (a) has planned principal activities;
- (b) has identified mineral reserves and processes needed to generate the inputs required for output production;
- (c) is pursuing a plan to produce outputs; and
- (d) will be able to sell the produced outputs.

Not all of the above factors need to be present for a particular integrated set of activities and assets in the development stage to qualify as a business. Business acquisitions are accounted for using the acquisition method, in which the acquired assets and liabilities are recorded at fair value at the date of acquisition. Direct costs associated with a business combination are expensed as incurred.

Acquisitions in which a business is not acquired are treated as an asset purchase. Under an asset purchase, the fair value of the consideration provided is allocated to the individual fair value of assets and liabilities assumed on the basis of their relative fair values at the time of acquisition. The costs of acquisition for an asset acquisition are deferred and capitalized in the period they are incurred. In the event the acquisition is not completed, these costs would be immediately expensed.

The Apolo and Caballo Blanco acquisitions (Note 6) were treated as an asset purchase since, at time of acquisition, it was not a business.

Exploration and evaluation expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment to determine whether it is likely that future economic benefits are likely, from either future exploitation or sale, or whether activities have not reached a stage that permits a reasonable assessment of the existence of reserves. The determination of a compliant resource is itself an estimation process that involves varying degrees of uncertainty depending on how the resources are classified (i.e., measured, indicated or inferred).

Estimates and assumptions may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of such expenditures is unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

Deferred taxes

The Company recognizes a deferred tax asset to the extent recovery is probable. Assessing the recoverability of deferred tax assets requires management to make significant estimates of future taxable profit. To the extent that future cash flows and taxable profit differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted. In addition, future changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods.

Share-based payments

The Company grants share-based awards as an element of compensation that includes stock options and restricted share units.

Share-based payments for stock options are determined using the Black-Scholes option pricing model based on estimated fair values at the date of grant and is expensed to profit or loss over each award's vesting period. The Black-Scholes option pricing model utilizes subjective assumptions such as expected price volatility and expected life of the option. Changes in these input assumptions can significantly affect the fair value estimate.

Share-based payments for restricted share units are determined using the market price at the date of grant and is expensed to profit or loss over each award's vesting period.

For the six months ended October 31, 2018 and 2017

(Amount expressed in thousands of Canadian dollars, except where indicated)

Derivative assets and liabilities

Management is required to determine assumptions used in financial fair value models to estimate derivatives liabilities raised from share purchase warrants, and gold forward contracts where contractually applicable. The assumptions may be adjusted at each reporting period and the actual value of the derivative liability may differ from the amount currently provided.

Functional Currency

The Company is involved in the exploration and development of gold with continued operations that are heavily reliant on international economics such as the price and demand of gold and other commodities. The Company parent company's resources, future sales and competitive forces are measured in CAD and have determined the functional currency of all its entities to be CAD. For all of the foreign subsidiaries, which are located in Mexico, the functional currency is denominated in Mexican Pesos.

Basis of consolidation

These consolidated financial statements include the accounts of the Company and its subsidiaries. All amounts are expressed in Canadian dollars, unless otherwise stated. Intercompany transactions and balances between the Company and its subsidiaries are eliminated. The principal subsidiaries of the Company and their geographic location as at October 31, 2018 were as follows:

3 Summary of significant accounting policies

New Accounting Standards Adopted During the Period

IFRS 9 Financial Instruments

This new standard is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

IFRS 15 Revenues from Contracts with Customers (“IFRS 15”)

This standard was issued on May 28, 2014 and will replace IAS 11 Construction Contracts (“IAS 11”), IAS 18 Revenue (“IAS 18”), and related interpretations. This new standard outlines a single comprehensive model to be used in recognizing revenue arising from contracts with customers, and contains more prescriptive guidance than in IAS 11, IAS 18 and related interpretations. The core principle in IFRS 15 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the

(Amount expressed in thousands of Canadian dollars, except where indicated)

consideration the entity expects to be entitled to in exchange. The standard is effective for reporting periods beginning on or after January 1, 2018, with early adoption permitted.

The Company has analyzed the impact of adopting IFRS 9 and IFRS 15 and concluded that there will be no material changes as a result of adopting these standards.

Recent accounting pronouncements issued but not yet effective

IFRS 16, Leases ("IFRS 16) and revised IAS 17 ("IAS 17)

The IASB issued IFRS 16 and revised IAS 17 in January 2016. IFRS 16 specifies how to recognize, measure, present and disclose leases. IFRS 16 provides a single lessee accounting model, requiring the recognition of assets and liabilities for all leases, unless the term of the lease is twelve months or less or the underlying asset has a low value. Lessor accounting however remains unchanged from IAS 17 and the distinction between operating and finance leases is retained. IAS 17, as revised, now prescribes the accounting policies and disclosures applicable to leases, both for lessees and lessors.

The Company has not yet completed the process of assessing the impact of IFRS 16 will have on its consolidated financial statements, or whether to early adopt this new requirement.

4 Other receivables and prepaid expenses

	October 31, 2018	April 30, 2018
Other receivable	\$ 33	\$ 59
IVA receivables*	2,668	2,411
Prepaid expenses	38	28
	\$ 2,739	\$ 2,498

*IVA receivables is value added tax receivables in Mexico which generally applies to all imports, supplies of goods, and the provision of services by a taxable person unless specifically exempted by a particular law. The tax is imposed by the federal government of Mexico and ordinarily applies on each level of the commercialization chain.

5 Financial instruments

Fair values of financial instruments

The fair values of financial instruments are summarized as follows:

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash and cash equivalents, and marketable securities. The Company's cash and cash equivalents are held through large Canadian financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure as described in Note 10. The accounts payable is due within the current operating period.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows from a financial instrument will fluctuate because of changes to market interest rates. The Company is exposed from time to time to interest rate risk as a result of holding fixed income cash equivalents and investments, of varying maturities. A 1% change in market interest rates would result in no significant change in value of cash and cash equivalents or fixed income securities. The risk that the Company will realize a loss as a result of a decline in the fair value of these assets is limited as they are generally held to maturity.

Foreign Exchange Risk

The Company operates in Canada and Mexico. As a result, the Company is exposed to foreign exchange risk arising from transactions denominated in foreign currencies.

The operating results and the financial position of the Company are reported in Canadian dollars. Fluctuations of the operating currencies in relation to the Canadian dollar will have an impact upon the reported results of the Company and may also affect the value of the Company's assets and liabilities.

The Company's financial assets and liabilities as at October 31, 2018 are denominated in United States Dollars, Canadian Dollars, and Mexican Pesos, and are set out in the following table:

Candelaria Mining Corp.

The Company's financial assets and liabilities as at April 30, 2018 are denominated in United States Dollars, Canadian Dollars, and Mexican Pesos, and are set out in the following table:

	Canadian Dollars	US Dollars	Mexico Pesos	Total
Financial assets				
Cash and cash equivalent	\$ 50	\$ 1,949	\$ 110	\$ 2,109
Other receivables	1	-	2,438	2,439

The Company's reported results will be affected by changes in the US dollar to Canadian dollar and US dollar to Mexican Pesos exchange rate. As of October 31, 2018, a 10% appreciation of the Canadian dollar relative to the US dollar would have decreased net financial assets by approximately \$129 (April 30, 2018 - \$21). A 10% depreciation of the US Dollar relative to the Canadian dollar would have had the equal but opposite effect. A 10% appreciation of the Mexican Pesos relative to the Canadian dollar would have decreased net financial asset by approximately \$267 (April 30, 2018 - \$245) and a 10% depreciation of the Mexican Pesos would have had an equal but opposite effect. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risk.

The table below summarizes the maturity profile of the Company's non-derivative financial liabilities.

NOTES TO CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended October 31, 2018 and 2017

(Amount expressed in thousands of Canadian dollars, except where indicated)

On February 27, 2015, the Company, entered an agreement (the “Agreement”) with the shareholders of Apolo to acquire 60% of Apolo’s issued and outstanding common shares.

Apolo is a privately owned exploration company with certain mining concessions located in the State of Zacatecas, Mexico (the “Apolo Property”). Pursuant to the terms and conditions of the Agreement, the Company will earn the 60% interest by:

- i) Paying an aggregate of US\$250 to the shareholders of Apolo on the agreement approval date, March 22, 2016 (paid as at April 30, 2017); and
- ii) a further US\$250 (\$331) to the shareholders of Apolo (paid as at April 30, 2017);
- iii) Issuing a total of 6.7 million common shares (first installment 2.0 million common shares issued as at March 17, 2016) of the Company in installments over an 18 months period beginning on the March 22, 2016. The remaining 4.7 million common shares (\$4,233) was issued on May 2, 2017; and
- iv) Funding exploration expenditures of a minimum of US\$3,500 (criteria is met as at April 30, 2017) by advancing funds to Apolo on or before March 22, 2018 (the “Funding Commitment”); and
- v) Lending or arranging for a third party to loan, to Apolo, a minimum of US\$1,000 on or before March 22, 2017 from the closing date (the “Loan”). The Company shall not issue dividends until the financing and the Loan are fully paid. This criteria is met from the issuance of the \$1,625 convertible debenture (note 7(a)).
- vi) As part of the transaction, the Company issued 2,469,333 shares to holders of Apolo notes with a fair value of \$370, and 400,000 shares with a fair value of \$60 on March 17, 2016. As a result a total of \$430 transaction costs are included as the total consideration above. The \$850 advanced in the prior year was forgiven.

Subject to the terms and conditions set forth in the Agreement, the Company will pay an additional US\$100 (the value of these payments has not been recognized in the statement of financial position as at January 31, 2018 due to the level of uncertainty surrounding the conditions required for the payments) to the Apolo shareholders annually if all of the following conditions are satisfied:

- Apolo reaches a production of 250 tons per day on the Apolo Property;
- any portion of the Funding Commitment remains outstanding and payable on due date;
- any portion of the Loan remains outstanding and payable;
- the price of gold is over US\$1,100 per ounce; and
- the price of silver is over US\$17 per ounce.

The Company will grant a 1.5% net smelter royalty (“NSR”) on the Apolo Property to the shareholders of Apolo. The Company will have a right of first refusal on the NSR and on the remaining 40% interest in Apolo held by the Apolo shareholders.

On August 1, 2016, which was the date that the Company obtained control of Apolo, the Company consolidated Apolo’s statement of financial position and statement of profit and loss.

Subsequent to October 31, 2018, on December 5, 2018, the Company announced that it has agreed to issue 7,075,472 of the Company’s common shares to the shareholder of Minera Apolo S.A. de C.V. (“Minera Apolo”) to acquire the remaining 40% of the shares of Minera Apolo.

b) Mineral interest in Caballo

The Company has accounted for the acquisition as an asset purchase and the purchase price allocation is summarized as follows:

On May 11, 2016, the Company signed an agreement to acquire the Caballo Blanco Gold Project (“Caballo Blanco”) in Veracruz, Mexico from Molimentales Del Noroeste, SA de CV, a subsidiary of Alio. Pursuant to the terms of the agreement, Candelaria will pay Molimentales a total of US\$12.5 million in cash and assume US\$5 million in liabilities in exchange for the project and all related rights and assets.

Pursuant to the terms of the agreement, the Company will acquire the Caballo Blanco project in exchange for cash payments to be paid over a period of twelve months as follows:

- i) US\$1,250 payable on signing of the agreement as a non-refundable deposit (paid as at April 30, 2017). Of the US\$1,250, US\$250 was paid directly from Credipresto, where a director of the Company is the president however is not in a position to control. (part of the \$1,625 convertible debenture issuance, see note 7(a)).
- ii) US\$2,250 payable no later than 15 business days from the date of the agreement as an additional non-refundable deposit (paid as at April 30, 2017).
- iii) US\$6,500 payment upon closing, which is to occur on or before June 24, 2016 (US\$5,750 paid as at April 30, 2017). US\$750 (\$963 as at April 30, 2018) accrued as at April 30, 2018 until Alio settle a legal dispute with one of the concessions.
- iv) Issuance of a US\$2,500 (\$3,250) non-interest bearing secured promissory note due on the earlier occurrence of the Company receiving permits or July 20, 2017. The US\$2,500 (\$3,412) was repaid as at April 30, 2018.

The Company has discounted this promissory note using a discount rate of 12% over the expected life of the promissory note:

exercise price for options granted may not be less than the market price of the shares on the day immediately preceding the date of the grant of the option.

On March 27, 2018, the Company granted stock options and restricted share units to certain officers and directors of the Company.

Options to purchase up to 750,000 common shares were granted to an officer of the Company, pursuant to the Company's stock option plan, exercisable at a price of \$0.68 per common share. The stock options have a term of 5 years and vest in stages with 1/3 vesting immediately on the date of grant and the remainder to vest 1/3 every on June 27, 2018 and September 27, 2018. The fair value of the share options was estimated at \$381 on the date of grant using the Black-Scholes option pricing model, with the following assumptions: expected option life of 5 years, expected stock price volatility 124%, forfeiture rate of 0%, dividend payment during life of option was nil, risk free interest rate 2.03%.

Stock based compensation expense related to this option grant for the six months ended October 31, 2018 was \$110 (2017 - \$nil).

In addition, 1,925,000 restricted share units ("RSUs") were awarded to officers and directors pursuant to the Company's restricted share unit plan. The RSUs have various vesting terms ranging from immediate vesting, vesting in stages with 1/3 vesting immediately on the date of grant and the remainder to vest 1/3 every three months from the date of grant, and vesting in stages with 1/3 vesting immediately on the date of grant and the remainder to vest 1/3 every six months from the date of grant.

The share based expense related to the RSU grant for the six months ended October 31, 2018 was \$492 (2017 - \$nil).
